Subject: SCWE RIS Draft

Good morning,

I'm a licensing engineer for 72-09 and 72-20. I apologize for missing the formal comment period for the SCWE RIS. Although the following suggestion might appear to be humorous, I hope you take it seriously.

In the intent paragraph of the draft RIS, the NRC provides the pronunciation of the acronym, SCWE, as "squee". I suggest we change the pronunciation to "swee" with the C silent. My concern is that people might refer to any SCWE regulations promulgated in the future as a "squee law" or "squeel". This would be unfortunate, given the seriousness of this subject.

Thank you for your time,

Michael Croson, Licensing Engineer
